OBJECTIVE

Aspiring Software Engineer with strong skills in Java, Full Stack Development, DevOps, REST APIs, and Agile, seeking an opportunity to contribute to systems analysis, application design, coding, testing, implementation, maintenance, production support, and software development while enhancing technical and problem-solving abilities.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Frontend Technologies:** Angular, TypeScript, Bootstrap
- **Backend Technologies:** Spring Boot, Spring Security, JWT Authentication, Hibernate/JPA, Node.js, Express.js, REST APIs
- **Database:** PostgreSQL, MySQL, Neo4j, Database Design & Normalization
- **Generative AI & AI Technologies:** LLMs, RAG, Prompt Engineering, Embeddings, Chunking, Knowledge Graphs, Agentic AI, LangChain, LangGraph, CrewAI, Vector Databases, Semantic Search, Hybrid Search, Re-ranking, Apache Tika, Ollama, AI Guardrails, RAGAS, DeepEval, Transformer Architecture, Attention Mechanism, Tokenization, Context Window
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway, IAM, RDS), Microsoft Azure, Docker, Git, GitHub
- **Data Engineering & Analytics:** Azure Data Factory, Azure Databricks, Azure Data Lake, ETL Pipelines, Power BI
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST API Design
- **Tools:** VS Code, Postman, Streamlit

PROJECTS

AI Memory Mirror (In Progress)

- Built an AI-powered knowledge assistant using Retrieval-Augmented Generation (RAG) and semantic search.
- Developed Spring Boot microservices for authentication, document processing, chat history, and learning analytics.
- Implemented PDF parsing, chunking, embeddings, and vector-based retrieval for contextual question answering.
- Designed Neo4j knowledge graph integration and interview readiness analytics dashboard.
- Developing Angular frontend for real-time chat, learning timeline, weakness tracking, and visualization.

AI Government Scheme Advisor (RAG Chatbot)

- Built an AI-powered chatbot using LLM + RAG to answer queries on government schemes
- Implemented retrieval pipeline to fetch relevant documents and improve response accuracy
- Designed backend logic for efficient query processing and context management
- Developed interactive UI using Streamlit for real-time user interaction
- Improved response relevance by integrating structured prompts and contextual outputs

Olympic Analytics (Azure Data Engineering)

- Developed a cloud-based data pipeline for large-scale Olympic data analytics
- Designed and implemented ETL pipelines using Azure Data Factory
- Processed and transformed data using Azure Databricks
- Stored and managed data in Azure Data Lake for scalable querying
- Optimized workflows for high performance, reliability, and efficient data processing

INTERNSHIP EXPERIENCE

Full Stack Intern (Virtual) – Matrimony.com | Dec 2024 – Apr 2025

- Developed a full-stack food delivery application using Angular, Node.js, and MySQL
- Built secure REST APIs for menu, cart, and order management
- Implemented authentication mechanisms for secure user access
- Designed modular backend architecture for scalability and maintainability
- Integrated frontend and backend to enable real-time order tracking and updates

Green AI Intern (Virtual) – Edunet Foundation | Apr 2025

- Built an AI model to detect wildfire images using deep learning techniques
- Developed a CNN model using TensorFlow/Keras for image classification
- Applied image preprocessing and augmentation techniques to improve accuracy
- Achieved over 90% training accuracy through model optimization
- Visualized performance using loss and accuracy graphs for evaluation

Data Visualization Intern (Virtual) – Infosys Springboard | Oct – Dec 2024

- Analyzed and processed air quality datasets using Python (Pandas)
- Developed interactive Power BI dashboards for pollution analysis across cities
- Built a chatbot using fuzzy matching integrated into a Streamlit application
- Enabled automated PDF report generation for summarized insights
- Improved data usability by providing interactive and user-friendly visualizations

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning (2022–2026)

K. Ramakrishnan College of Engineering, Trichy

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services
- Microsoft Azure Fundamentals (AZ-900)
- Python Programming – GUVI
- Java Programming – Infosys Springboard
- Database Management Systems (SQL) – Infosys Springboard
